

## Canvas Prints

We have invested in the technology required to ensure that our Canvas Prints are of the ultimate quality available.

The material used is 350gm polycotton canvas. We use Solvent Based Inks to ensure print colour stability for an extended period. Indeed we are so confident in the longevity of our Canvas Prints that we offer a lifetime (75 years +) guarantee against fade.

Our frames are deep kiln dried redwood produced from FSC forests. Canvas is stretched to optimum tension to completely obviate the need for later re-tensioning.

### Edge Detail

Printed canvas extends around the sides of the frame. This means that the image can either continue to bleed or be mirrored depending on the subject matter. Alternatively, we can leave the sides unprinted (white) or print the sides any other colour - see below. There is no cost difference whichever edge detail is chosen.

### Hanging

Our prints are provided with easy hang fittings which allow the print to be mounted completely flush to the wall.

### Standard Sizes

By popular request we now offer budget priced Standard Canvas sizes. By ordering frames in bulk we are able to offer these at exceptional prices and faster turnarounds without compromising on quality.

### Further Information

**Turnaround:** Times quoted are from receipt of full payment and complete, print ready pdf, artwork.

### Bespoke Sizes

Our unique production system means we are able to produce Canvas Prints of any size, from a minimum of 20cm in either direction, to a maximum of 150cm, again in either direction. If your requirement is for a print outside these parameters please request a quote.

### Pricing Your Print

Area of Print = Width (cm) x Length (cm) = **A**

E.g. For a 40cm x 40cm print - **A** = 1600

So the Multiplication Factor is **0.036**

This means the cost of your print is:

1600 x **0.036** (+ £10.00 setup) = **£67.60 + VAT**
